

Quality, Food Safety and Environmental Policy

We are a company with a consolidated development in the pulses sector. Our main objective is to become an example of quality and good manufacturing practice for all our customers. For this reason, the Management has implemented this Policy in order to guarantee the quality and food safety of its products and undertakes to disseminate it to all company levels and to provide the necessary resources for its enforcement.

Therefore, the company expresses its firm commitment to implement the standards of quality, environment and food safety, including the provision of the necessary resources, effective communication, checking systems and adoption of measures for ongoing improvement and all this through the implementation of a Quality, Food Safety and Environmental System that revolves around the following commitments:

- To meet customers' demands in order to ensure satisfaction, assuming our responsibility towards them.
- To ensure resource management, while making the commitment to avoid waste, betting on the efficient and rational use of the same, as well as protecting the environment.
- To analyze the environmental aspects as well as impact and management optimization, thus protecting the environment.
- To comply with the legal requirements of the sector in terms of quality, food safety and the environment.
- To make our staff aware, training them and promoting teamwork, internal communication, customer focus, and respect for food hygiene.
- To develop safe products and continuously evaluate health hazards, identifying critical control points, with regular monitoring requirements and corrective measures, if necessary.
- To improve our products and processes on a regular basis, using more appropriate technology, planning and checking work procedures at regular intervals.
- To adopt sustainability measures to make an adequate use of the resources required by our processes, always seeking the quality and food safety of our products.
- To instil a corporate culture in an ethical responsibility sense, including personal ethics, such as honesty and a sense of belonging towards quality and food safety targets traced by our company by raising awareness among the staff.
- To trade safe products for the consumer, thoroughly passing the current food codes and the applicable sanitary regulations.
- To maintain our Organic Product line in both dried and cooked pulses.

Likewise, the Management is committed to support the Policy, review it and keep on a continuous improvement process of the Management System, in order to achieve the objectives.
